

Aura series getting started guide

Please read before use

Reminder: Aura is a new smart scanner; very different to traditional equipment. You must read this getting started guide to become a pro quickly.

1. Assembly

1. Take out the Aura scanner, [black work mat](#), and other accessories.
2. Place Aura on a flat surface. Align the notch on the [black work mat](#) carefully with the base of Aura.

2. Mode descriptions

Aura has 2 modes: Table Lamp and Scanner.

Long press knob for 1s: switch on/off

Short press knob: switch between Table Lamp and Scanner mode.

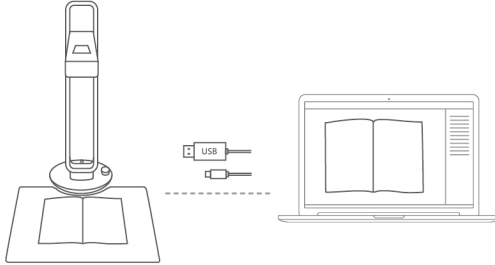

3. Table Lamp mode

1. Connect the power and wait for the power indicator light to turn on. Long press the knob for 1s to enter Table Lamp mode by default.
2. The table lamp brightness has 6 levels. Turn the knob to change the brightness.
3. You can control the lamp with your phone (turn on/off and adjust the light settings of the lamp). Scan the QR code to download the CZUR app; register and add “Aura” functions to control the lamp.

4. Scanner mode

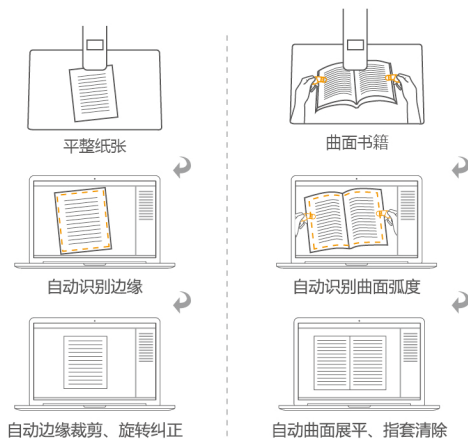

1. In Table Lamp mode, short press the knob to switch to Scanner mode.
2. Download and install the CZUR Aura software on your computer. Official website download link: www.czur.com (Windows users can install from the in-box CD).
3. Connect Aura to the computer through the in-box USB cable. Connect the foot pedal to Aura.
4. Run the CZUR Aura software. Configure the scanning settings. Use the foot pedal to start scanning.

5. Scanned files will be saved on the local drive. (You can customize the save destination.)

5. Smart scanning description

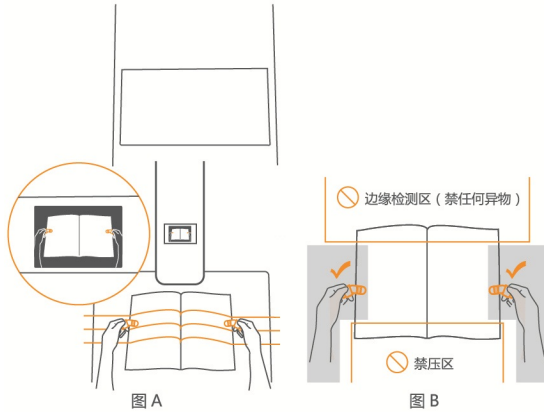

1. Aura is not only able to scan single sheet documents and cards; it can even scan bound business contracts, books, files, etc.
2. Aura processes the scanned paper in 3 modes: (1) “Flat Singe Page”; (2) “Facing Pages”; (3) “Manual Selection”.
3. Aura has different ways of smart processing depending on the document. It will automatically optimize image processing depending on the paper layout.

6. Special instructions

1. When scanning, prevent strong ambient light from interfering with the laser lines. (For example, keep away from windows with direct sunlight.)
2. Correct placement of the black work mat: The black work mat at must cover the entire display

- area **so that** the edges do not show (picture A).
3. Try to center the scanned paper to get the best scan quality ([picture A](#)).
 4. **Three** laser **lines** will turn on every time you scan. When the laser **lines turn off**, then the scan is completed. Keep the paper still while the laser **lines are** on (picture A).
 5. When scanning “Facing Pages” (**bound papers**), you should use the **finger cots** to **avoid** finger marks, and the correct **holding** method must be used (picture B).

7. Frequently asked questions

1. Aura uses UVC standard protocols and is classified as **a** standard driverless device. If the device **is not** recognized by the computer, you can try the following troubleshooting methods:
 - 1) Turn Aura **off**, **disconnect power adapter**, then **power** back on after it is connected to the computer.
 - 2) Restart Aura; reconnect the USB cable.
 - 3) Switch to another USB port on the computer.
 - 4) Close anti-virus software, security, and back end defensive software **on the PC**.
 - 5) Check “device manager” **on the PC**. If the yellow exclamation mark/unknown device appears, right click to update the drivers or disable then **re-enable** the device. Restart **the** CZUR Aura software, then try again.
 - 6) Restart the computer or use another computer.

If you have any problems during use, please read the **in-box** manual or visit the official website (www.czur.com) support page to get the more detailed manual.
